I only just downloaded the app after paying quite a bit of money. I can't even get through the first short relaxation meditation. It keeps stalling and I have to press play every few seconds. I have read that using the computer is better . Which I will but is extremely cold in my office and not conducive to relaxation PLEASE improve your app! There is no way to send in a complaint or email support This would be useful. I feel like I'm losing money right now because I want learn and can't.

Update: the app still prioritizes marketing over ease of use..If you can avoid using this app (use the website interface) by any means necessary, do. You will constantly be barraged with advertisements even after purchasing an expensive program. Also, the app is really buggy. I often have videos that won't play. Also, customer service is terrible. They don't read the emails properly. 10 emails later, and they still didn't understand my problem with the app. The website version is just fine, FYI.

Great courses. The app has some issues: after a video the screen stalls and the only way to continue using your phone is to force closing the app. It's not easy to select a different language. Some things are not designed for responsiveness.
